

Increase your performance, reduce your costs: THIMM Consulting supports you in the optimisation of your whole packaging supply chain. With comprehensive consulting and intersectoral know-how for a success-oriented organisation of your packaging processes and product lines. Make use of our holistic approach to consultation - our experience for your practice.

From analysis to implementation. As an independent consulting company we have process skills and packaging know-how combined with strength in implementation. This is why we can offer an integrated consultation which opens new ways for a further development of your packaging processes and packaging products. Whether small or big - there is nothing that could not be improved.

Intersectoral experience. Special sector expertise and overall experience - these are the factors of the success of an in-depth consulting. Our references give proof of our great wealth of experience. We have successfully realised projects in the following sectors: automobile manufacturers and automotive suppliers, construction industry, computer industry, service industry, electronics and electrical engineering industry, glass industry, ceramic industry, mechanical engineering industry, furniture industry, food industry, porcelain industry, sanitary industry, packaging industry and trading companies.

Focus: value chain relevant to packaging. In order to increase your competitiveness we will develop together with you attuned best practice solutions: from the material-independent constructive and graphical planning of packagings to the streamlining of your packaging processes and logistics. We will support you with our innovative concepts beyond the bounds of department, factory and company matters.

Methodological expertise for your success. Benefit from our profound consulting expertise and a strong network of excellence. We select an experienced project team and approved consulting methods especially tailored to your requirements. The result: We can guarantee sustainable increases of output concerning potential analysis and benchmarking up to reorganisation of packaging processes and packaging products. Which potentials can we exploit for you?
